Data enthusiast with 5+ years of experience, seeking a client-facing role to help decision makers measure performance, deal with uncertainty, and make data-driven decisions by applying best practices of data warehousing, data visualization, and business analytics.

EXPERIENCE

Deloitte Consulting LLP – Arlington, VA **Consultant** **Nov 2016 – Present**

Provided client-facing development and analysis services on data warehousing projects for federal clients

- Developed an executive dashboard for the C-suite of a major federal research agency with 20K employees
- Supported legacy financial applications with 3K users, using best practices of ETL, data modeling, and design
- Utilized an agile development process to create weekly deliverables and pivot efforts based on client feedback

Vitality, Subs. of Discovery Holdings – Chicago, IL **Data Analyst** **Sep 2014 – Nov 2016**

Developed and analyzed processes to aid operations and strategy for a Software as a Service, health & wellness firm

- Evangelized the benefits of Business Intelligence, increasing adoption of the BI platform from 3% to 35%
- Identified risk factors and automated a quantitative basis to target retention efforts for at-risk clients
- Implemented basic data governance in several departments, enabling data-driven analysis of strategic initiatives
- Optimized and extended legacy production data models resulting in monthly cost savings of at least \$100k
- Defined and automated KPIs and SLAs for client-facing and support personnel to increase visibility and resolution
- Developed end-to-end processes of ETL, dimensional modeling, scripting, automation, and data visualization

Claraview, Div. of Teradata – Reston, VA **PS Consultant I / Associate Consultant** **Jun 2012 – Jun 2014**

Provided client-facing development and analysis services on business intelligence projects for Teradata clients

- Elicited requirements from a Fortune 100 client in telecommunications for a pro forma reporting application
- Developed an application and process that reduced 80 weekly labor-hours to 4 weekly labor-hours
- Delivered a prototype of novel executive views of RoIC for a Fortune 500 client in travel & hospitality
- Created a dimensional model utilizing an existing EDW and time-based calculations of asset-backed securities
- Generated ad hoc financial reports, helping the client increase cash flow and manage subleasing of assets
- Facilitated sessions with client's Business Intelligence team to improve data stewardship and reporting capability

Configment LLC – Charlottesville, VA **Intern** **Summer 2011**

Developed wireframes for servicing new entrepreneurs through the process of new venture creation

Booz Allen Hamilton – Arlington, VA **Intern** **Summer/Winter 2010**

Mapped a standardized process for the deployment and redeployment of the US Armed Forces

EDUCATION

University of Virginia – Charlottesville, VA **Sep 2007 – Jun 2012**

B.S. in Systems and Information Engineering | B.A. in Cognitive Science | Minor in Mathematics
